SMART DIGITAL SIGNAGE DISPLAY

With the smart signage display D230, advertising messages and information is conveyed directly to viewers at the POS with little effort. In addition to its bright 23.1" display the D230 has its own operating system and is controlled by app** or browser**. The built-in camera recognises the age and gender of the people viewing it via biometric features. This means appropriate content can be delivered to the specific target group. Shuttle supplies the D230 in a stand-alone version or as a client/server solution for enhanced requirements with a 4G mobile internet option.

Further information at: WWW.SHUTTLE.EU
