POWERFUL ALL-IN-ONE PC WITH INTEL CORE I3 PROCESSOR

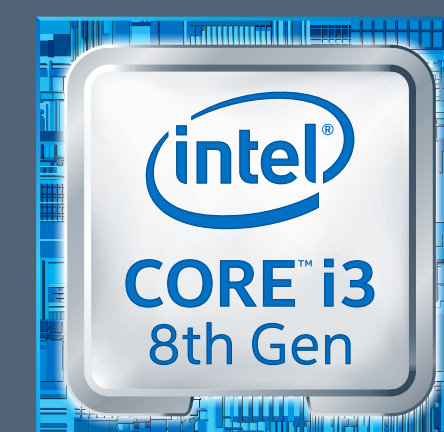

Short response times are essential in the areas of data collection and machine control, or when visualising information. The XPC X50V7U3 from Shuttle is completely fanless, making it low-maintenance and noiseless. Thanks to a resistive touchscreen that is dust and splash-proof, the X50V7U3 can also be operated with wet or dirty hands. This all-in-one PC is extremely flexible in its hardware features and available as a white or black version.

More information at: WWW.SHUTTLE.EU
