SH370R6 MINI-PC WORKSTATION ► SPACE-SAVING AND PRODUCTIVE AT THE SAME TIME

Constantly high levels of performance where it really matters – this is exactly what the XPC cube SH370R6 offers. It has a full range to draw on and makes use, for example, of any Intel Core processors for socket LGA1151v2 with up to six cores and up to a maximum TDP of 95 W. 64 GB of DDR4 memory, up to four drives in RAID mode, an NVMe SSD, USB 3.1 with 10 Gbit/s and support for the most powerful PCIe graphics cards round out the package. And even without an additional graphics card, the SH370R6 is capable of controlling three 4K monitors, if its HDMI 2.0b port and the two DisplayPort connectors are used. Its PCI Express x4 3.0 slot makes it possible, among other types of cards, to install a 10 Gbit network card, and the free M.2 slot can accommodate WLAN modules. Superbly connected and brimming with top features, the SH370R6 truly deserves a prominent place on any desktop.

FEATURES

- SUPPORTS PROCESSORS FOR SOCKET LGA1151V2
- UP TO 64 GB OF DDR4 RAM
- 2x PCI EXPRESS 3.0 (X16, X4)
- 2x M.2 (2280, 2230)
- SUITABLE FOR DUAL-SLOT GRAPHICS CARDS
- SPACE FOR FOUR DRIVES (SSD, HDD, ODD)

Subject to errors and alterations.
