## WELCOME TO THE WORLD OF SPACE-SAVING MINI PCS

It all began in 1983. We started early and have been a genuinely pioneering force in the industry since 2001. Over the past 23 years, we have launched an array of space-saving and energy-efficient PCs for every area of application. The unique feature of our machines is the use of sophisticated cooling concepts for minimum operating noise. We manufacture reliable Slim PCs, Mini PCs, and All-in-One PCs for the office – and for extremely demanding professional applications.

## COMPANY PROFILE

The principal Taiwanese company Shuttle Inc. was founded in Taipei, Taiwan in 1983. The listed, globally operating company is represented by various subsidiaries around the world. Shuttle Computer Handels GmbH has been based in Elmshorn, Germany since 1994 and is the European head office. Many years of experience as a manufacturer of high-quality mainboards culminated in 2001 in the presentation of the world's first Mini-PC, the SV24. This milestone is regarded as a turning point, and since then Shuttle has specialised in developing and manufacturing innovative Mini-PCs. Its core business focusing on the B2B sector is the XPC brand and the concept of Barebone PCs which already feature key components and can be manufactured to produce complete systems that suit individual requirements.

Shuttle has now successfully expanded its product range to include solutions for vertical markets such as digital signage, POS/POI and industry and opened up new areas of business. Shuttle consistently implements the latest technologies in proven concepts, making it a strong and reliable partner for distributors, resellers, system integrators as well as OEMs and ODMs.

# SOLUTIONS FOR ANY KIND OF APPLICATIONS

*Our space-saving Mini PCs are real multi-purpose machines. This is just a small selection of possible scenarios that Shuttle holds a solution for.*

## DIGITAL SIGNAGE

Digital advertising areas, information screens and electronic signs are now an integral part of everyday life. Shuttle supplies the right player for every scenario – and for a wide range of operating systems. These compact machines are all characterised by their robust design. They range from ultra-high-performance models and machines with innumerable ports and connections to low-energy, continuously running fanless devices. High-strength steel and a broad temperature spectrum enable installation even in difficult environments.

## POS

The purchase of a POS system often represents a considerable capital investment. However, with Shuttle's energy-saving All-in-One PCs in your desired configuration, you save money. Thanks to the tilting pedestal and standard installation mount, these machines can be installed almost anywhere. And our new IP54-compliant models are now even more robust. Maximum flexibility in terms of choice of hardware and software enables the creation of a POS solution that exactly meets your requirements.

## SERVER

As a UTM/firewall, file server, web server or mail server and much more – the Mini-PCs from Shuttle cut a fine figure. Two network connections (and even more via expansion cards) as well as Wi-Fi make it possible to set up versatile server services or integrate them into existing complex network structures. Powerful processors guarantee a high packet throughput rate and up to 128 GB of memory enable virtualisation. Shuttle offers various solutions in different chassis formats for your specific server.

## INDUSTRY

Even in tough environments in which supreme reliability particularly matters, people choose products from Shuttle. Are you looking for fanless Mini-PCs for production environments and logistics centres? Perhaps robust technology for inter-linked control cabinets with lots of inputs and outputs? Even versions with superb performance for demanding real-time calculations in the area of image recognition and data capture are available. Allow yourself to be impressed by our variety of products. If you have any questions, we will be happy to advise you.

## OFFICE

It is important to be able to work without disturbances and distracting noises. And a Shuttle slim desktop PC is the ideal companion at work – it stays discreetly in the background, but is also able to spring into action when needed. These tiny PC solutions meet your requirements precisely. You have a wide choice of processors, for example the energy-saving, dual-core Intel Celeron or the extremely powerful Intel Core i7 models. Is just 8 GB plenty for you or do you need 64 GB of memory? And what about the number of drives and network and data connections? Whatever your requirements, we have the right model for you.

## GAMING

Over 60 frames per second, in highest resolution and with maximum depth of detail guarantee thrilling matches on the screen. The XPC cubes from Shuttle offer space for current Intel Core processors, up to 128 GB of RAM and the latest dual-slot graphics cards. In conjunction with a quick NVMe SSD, you can move on to the next map and a higher level without a long wait. One major advantage of Mini-PCs is their space-saving size. This means that a Shuttle XPC cube can swiftly be stored away in a small bag and then easily set up anywhere.

Processor socket	LGA 1200, TDP max. 65 Watt
Processor compatibility	Intel Core i3/i5/i7/i9, Pentium, Celeron (10 <sup>th</sup> /11 <sup>th</sup> Generation, 'Comet Lake' & 'Rocket Lake')
Slots	1x M.2-2230, 2x M.2-2280, 1x PCI-Express-x16-4.0
Empty slots	1x M.2-2230, 2x M.2-2280, 1x PCI-Express-x16-4.0
Memory	Up to 2x 32 GB DDR4 SO-DIMM (64 GB)
Graphics	Depending on the selected processor and PCIe graphics card
Display connectors	1x HDMI 2.0a, 1x DisplayPort 1.4
Network	1x Gigabit Ethernet (Intel i219LM)
External connections	4x USB 3.2 Gen 1 (5 Gbit) type A, 4x USB 2.0 type A, audio, mic
Internal connections	VGA, 1x SATA
Drives	1x 2.5" SATA, 1x M.2-SATA/NVMe, 1x M.2-SATA
Power supply	180 Watt, 19,5 Volt DC
Supported operating voltage	19 Volt ±5 %
OS support	Windows 10, Windows 11, Linux (64 Bit)
